HCV Treatment Plans for Staten Island

- HCV screening is a standard of care across all practices at Brightpoint Health completed upon initial engagement and annually or more frequently if indicated
- We have participated in a number of projects which include testing, linkage to care, and treatment- all with exceptional outcomes.
- Plan on putting a provider on-site one day per week to start (HCV and MAT treatment)
- Dependent on response will increase hours as well as consider HCV navigator position
- Integrated Care Model- Includes referral for internal substance abuse treatment, harm reduction, and/or Mental health services (plans to add A31 at Bay Street location).
