

FUNDING APPLICATION STRATEGIES

Follow these strategies to build a strong NYC Discretionary Funding Application!

Use Program Data

- Report on outcomes from the previous year.
- Reference your monthly programs report and use data to demonstrate your success.

Examples include:

- How much outreach did you conduct?
- How many people did you serve?
- How many screening events or educational programs did you host?

Include Annual Report Data

- Use NYCDOHMH Viral Hepatitis Annual Report to describe the number of new infections and trends
- Utilize maps that show number of people newly reported with chronic hepatitis B and C in NYC by City Council District.

Include NYC Elimination Plan

- Let City Council know that you are part of a larger effort to eliminate viral hepatitis.
 - 6.5 Support increased funding for patient navigation programs (such as Check Hep C) for people with hepatitis C.
 - 2.8 Offer hepatitis B testing at community venues, in congregate settings at faith-based and cultural activities, in pharmacies, and alongside other types of testing.
